

A new keygen is uploaded for the Electronic Arts Game I've been playing. It's kind of interesting to see how many competitors lurk in the shadows, holding on to their own secrets with fervent jealousy. One day they will find out that this is a game they cannot win. I will always come out on top! Without fear, I enter their realms. Fear is for the weak! I have done battle with these foes before and each time, they will be weaker than before because soon I will have won them all over again. I knew the day would come when I would crack their locked files, and this day has come. I know that soon I will have to start learning about encryption techniques just to keep up with these game companies. The war of wits will be on! The more I look around at the current file cracking community, the more it makes me feel like it is in decline, but I will continue to fight along side them in their battles! It's always nice when you can help others in need.

**\*\*Update\*\*** - Electronic Arts Games released a new version of sims 2. Apparently it is not possible to create a new registry key anymore and this keygen does not work. Mwahahaha!

The following text was left inside of the exe of Electronic Arts Game:
